**STIDD Systems Awarded Contract by Norwegian Defense Material Agency**

*Coalition Partner Orders High-Tech Lithium-Powered Diver Propulsion Devices*

Greenport, NY -- STIDD Systems, Inc., a Greenport, NY, manufacturer of shock-mitigating marine seats and military submersibles, has been awarded a contract to build Diver Propulsion Devices (DPD) for the Norwegian Defense Material Agency (NDMA).

The DPD, a high-tech manned submersible, was designed and developed by STIDD Systems and is manufactured at its Greenport facility on the East End of Long Island, New York.

"The DPD is the most advanced fully certificated underwater mobility platform available today. It represents over 3 years of exhaustive safety, environmental and operational testing and we are proud to support this important program for Norway, one of America's most important Coalition partners," said Walter Gezari, CEO of STIDD Systems.

The DPD is in operational use by the United States Marine Corps, Navy SEALs and US Coalition partners. "The DPD represents a new operational capability for maritime forces. With the DPD in their inventory, Commanders now have unprecedented options for mission planning and execution in today's post 9/11 threat environment," said Mr. Gezari.

For more information, contact: Walter Gezari, CEO, at STIDD Systems, Inc., P.O. Box 87, Greenport, NY 11944, Tel: 631-477-2400 ext. 123. Please e-mail Mr. Gezari at [wgezari@stidd.com](mailto:wgezari@stidd.com) or visit online at [www.stidmil.com](http://www.stidmil.com).
